

# Hagley's Create-an-Invention from Home!

Create-an-Invention, a longtime favorite activity of Hagley's Invention Convention, is coming into the home to inspire the inner creators in us all. The challenge of Create-an-Invention from Home is to design and build a solution to an important need or problem, using everyday household supplies.

## Plan

The theme for this Create-an-Invention from Home project is to invent a **social distancing device**. What kind of gadget, tool, or equipment will help people keep the recommended six-foot distance from each other?

## Build

### Household supplies ideas (you are not limited to items on this list)

- Toilet paper rolls (in high demand currently!)
- Paper towel rolls
- Egg cartons
- Milk and juice cartons (clean them first, please!)
- Coffee and snack cans
- Popsicle or craft sticks
- Takeout containers
- Cardboard
- String and yarn
- Tape
- Glue
- Cereal and tissue boxes (any box will do)
- Clothespins
- Straws
- Chopsticks
- Pipe cleaners
- Anything else you can find that will work with your invention.

## Share

Post a picture or video on Facebook, Instagram, or Twitter with the hashtag **#HagleyFromHome**. Please include a brief description of how your invention works. Once you've posted your invention, a personalized Hagley Patent Certificate will be reposted.
